

CIA World Factbook Economics Chart

Directions: Use the [CIA World Factbook website](https://www.cia.gov/library/publications/the-world-factbook) to find the following economic indicators for each country listed. In the chart below, record the two most recent data points for each category.

| Country | Type of Economy | Purchasing Power Parity (PPP)/Real Gross Domestic Product (GDP) | Real GDP Growth Rate | Real GDP Per Capita | Inflation Rate | Gini Index | Taxes and Other Revenues |
|---------------|-----------------|---|----------------------|---------------------|----------------|------------|--------------------------|
| Australia | Market | | | | | | |
| Cuba | Command | | | | | | |
| North Korea | Command | | | | | | |
| Singapore | Market | | | | | | |
| United States | Market | | | | | | |
| Venezuela | Command | | | | | | |

Definitions:

PPP/Real GDP - value of all goods and services produced in the country converted into U.S. currency; allows you to estimate buying power and compare costs while adjusting for different costs of living

Real GDP Growth Rate- a measurement of economic output that is adjusted for unemployment and inflation

Real GDP Per Capita- a nation's Gross Domestic Product (GDP) divided by the population

Inflation Rate - measures the change in current consumer prices from the previous year's consumer prices

GINI Index: how much income inequality exists in the distribution of income

Taxes and Other Revenues: the amount of money in the form of taxes the government collects; often shown as a percentage of GDP for better comparison
